Exam : **M9550-752**

Title : IBM Smarter Process Sales Mastery v1

Version : DEMO

1.Which statement is NOT true?
A. The Decision Server is based on Eclipse
B. The Decision Server allows to set up rules and events projects, define vocabularies
C. The Decision Server allows to do traditional software unit testing and step-by-step debugging
D. Rules and events projects are deployed only from the Decision Center
E. Decision services are organized from the Decision Server
Answer:C

2.Which statement is TRUE?
A. The Enterprise Console is part of the Decision Center and supports the full lifecycle of rule maintenance testing and simulation
B. The Decision Center provides an integrated repository
C. The Business Console, part of the Decision Center, provides a business-user friendly collaborative environment to maintain and update business rules
D. Governance methodology is built into the Decision Center
E. All of the above
Answer:E
Explanation:
Decision Center for z/OS provides an integrated repository and management

3.With IBM ODM, does a policy manager need to involve IT to evaluate the impact of business policy change?
A. Yes
B. No
Answer:A
Explanation:
Enabling business owners to manage their decision logic is an essential benefit of ODM. Also key is the fact that the full spectrum of disparate decisions that emerge from on-the-spot judgments, legacy code, processes, policy briefs, regulations, best practices, corporate documents and personal work aids is centralized in a governed and transparent business-rules repository that ensures visibility into the decisions driving critical business decisions and logic.
