**Title : Oracle WebCenter Portal
11.1.1.8 Essentials**

Version : DEMO

1. In which file should customization classes be specified in the cust-config section (under mdsconfig)?

- A. web.xml
- B. weblogic.xml
- C. adf-config.xml
- D. adfm.xml

Answer: C

Explanation:

http://docs.oracle.com/cd/E25054_01/webcenter.1111/e12405/wcadm_app_config_files.htm

2. Which two scoped managed beans must be Serializable in order to work without errors in a highly available application?

- A. Session scope
- B. Backing bean scope
- C. View scope
- D. Transient scope

Answer: B,C

3. The DesignWebCenterSpaces application contains a file called config.properties.

What is the purpose of this file?

- A. To enable a connection between JDeveloper and the Portal server. This will be used to upload and download assets directly from JDeveloper.
- B. It allows the developer to configure which asset types can be created or edited with this application.
- C. It is used to store classpath and library information, and the path to executables. That way, a local Portal instance can be started from JDeveloper.
- D. It is an internally used file. Developers should not have to manually configure this file, except when required by Oracle to do so.

Answer: A

Explanation:

4. While creating a Portal Template, you add a content facet and a panelCustomizable component into the template.

What impact does this have during run time?

- A. The content facet is required to hold content, and panelCustomizable is used to allow runtime editing.
- B. The template is missing the pageCustomizable component, which allows runtime editing.
- C. The content facet is optional, whereas panelCustomizable must be added to the template to allow editing.
- D. The panelCustomizable component is not required for editing, but only to allow drag and drop. This component is mandatory.

Answer: D

Explanation:

http://docs.oracle.com/cd/E16340_01/webcenter.1111/e10148/jpsdg_page_editor.htm

5. WebCenter Portal supports any mail server with IMAP4 and SMTP protocol support.

Which server distribution, however, has specific integration support within WebCenter Portal?

- A. IBM Lotus Notes
- B. MS Exchange
- C. UNIX Mail Server
- D. Google Mail Server
- E. Oracle Beehive

Answer: E
