Exam : **C_BOBIP_41**

Title SAP Certified Application Associate - SAP BusinessObjects Business Intelligence Platform 4.1

Version : DEMO

1.You change the title of a Crystal Reports object using the Central Management Console.
Where is this change reflected?
A. In the report file stored on the Input File Repository Server
B. In the log file of the Crystal Reports Processing Server
C. On the Central Management Server system database
D. In the report file stored in the Business Intelligence Archive Resource file
Answer: C

2.Where is the configuration information for processing servers stored?
A. Input File Repository Server
B. System database
C. Bootstrap file
D. Win32_x86 directory
Answer: B

3.How does the system behave if you have an Idle Connection Timeout setting on the Crystal Reports Cache Server that differs from the setting on the Crystal Reports Processing Server?
A. If the setting on the Cache Server is higher than on the Processing Server, this will cause excessive consumption of disk space.
B. If the setting on the Cache Server is lower than on the Processing Server, a user request could be closed prematurely.
C. If the setting on the Cache Server is higher than on the Processing Server, this could cause a memory overflow error.
D. If the setting on the Cache Server is lower than on the Processing Server, the data source connection could be closed prematurely.
Answer: B

4.Your report has more records than the value set for "Database Records Read When Previewing or Refreshing" on the Crystal Reports Processing Server.
What happens when you refresh the report from the BI launch pad?
A. The report returns partial results without a warning message.
B. A user is prompted to edit the report.
C. The report returns partial results with a warning message.
D. An error message is displayed.
Answer: D

5.On a production system landscape, you need to perform maintenance on a host that is currently running scheduled jobs.
What action should you perform on the Adaptive Job Server before shutting down the host?
A. Disable
B. Force Termination
C. Restart
D. Enable
Answer: A
