**Title** : IBM Tivoli Monitoring V6.2.2  
Fundamentals

**Version** : Demo

1. When can an acknowledgement be created?

- A. When others are working on the event.
- B. When operations staff makes a request.
- C. When an event indicator is visible in the Navigator.
- D. When a situation fires and the administrator wants to be first to acknowledge the event.

Answer: C

2. Which workspace chart best represents the proportional value of each data point to the whole.?

- A. Pie Chart
- B. Bar Chart
- C. Plot Chart
- D. Circular Gauge Chart

Answer: A

3. What is the purpose of the connectors in a Common Event Console?

- A. The Event Handler is incorporated to pass events.
- B. Connect to an event repository for the Common Event Console.
- C. Retrieve event data to be displayed in the Common Event Console.
- D. Send messages to the Message Log view from the Common Event Console.

Answer: C

4. How is it determined if a situation is associated with a Navigator item?

- A. Launch the Situation Editor from the toolbar.
- B. Right click the Required Navigator Item and select Situations.
- C. Select the properties for the Navigator Item and click Situations.
- D. Filter the situations for the Navigator item by Associated with Navigator Item.

Answer: B

5. Where are attributes to be displayed in a workspace view selected?

- A. In the Query tab of each workspace Properties.
- B. In the Filters tab of each workspace Properties.
- C. In the Query tab of each workspace view's Properties.
- D. In the Filters tab of each workspace view's Properties.

Answer: D

6. When is persistent event monitoring useful in IBM Tivoli Monitoring (ITM)?

- A. To count the number of events in ITM.
- B. To determine when a situation is needed.
- C. To determine whether a condition is consistent or intermittent.
- D. To determine when more agents must be deployed across a ITM environment.

Answer: C

7. How are new managed systems groups created?

- A. They are created when IBM Tivoli Monitoring is installed.

- B. They are created in the Manage Tivoli Enterprise Monitoring Services.
- C. They are created using the Object Editor under the Managed Systems Group tab.
- D. They are created with the Situation Editor within the Tivoli Enterprise Portal client.

Answer: C

8.What are the three default user groups provided with Tivoli Enterprise Portal?

- A. Administrator, Diagnostic Users, Operator
- B. Administrator, Application Users, Operator
- C. Application Users, Diagnostic Users, Operator
- D. Administrator, Diagnostic Users, Application Users

Answer: A

9.What is used to quickly switch from one workspace to another in the Desktop Portal Client?

- A. Link
- B. Launch
- C. Bookmark
- D. Graphic Icon

Answer: A

10.What is the minimum interval for Summarization and Pruning?

- A. 1 minute
- B. 5 minutes
- C. 15 minutes
- D. 60 minutes

Answer: C

11.Where are policies designed in the Tivoli Enterprise Portal client?

- A. In the Views.
- B. In the Workspace.
- C. In the Workflow Editor.
- D. In the Situation Editor.

Answer: C

12.How are attributes related to workspaces?

- A. Workspaces use views to display attributes to the user.
- B. Workspaces use attributes to determine graph types to display to the user.
- C. Workspace settings are stored in the Tivoli Enterprise Portal Server using attributes.
- D. Workspaces use attributes to determine which navigator items to associate with in the Navigator tree.

Answer: A

13.What is an example of a data element that can be monitored with a situation?

- A. CPU usage.
- B. Timestamp for event arrival.
- C. Event acknowledgement time.

D. Number of situations deployed.

Answer: A

14. Which two places can Workspace Administration Mode permission authority be set? (Choose two.)

- A. Users
- B. Members
- C. Member Of
- D. User Groups
- E. User Policies

Answer: A, D

15. What type of link uniquely identifies the target workspace?

- A. Dynamic
- B. Filtered
- C. Relative
- D. Absolute

Answer: D

16. When performing an investigation into the increased disk space usage of a Tivoli Enterprise Monitoring Agent, it is discovered that the historical data file is quite large. Which two actions will decrease the amount of data stored in that file? (Choose two.)

- A. Change Summarization from Daily to Hourly.
- B. Reduce the Warehouse Interval from 1 day to 1 hour.
- C. Increase the Warehouse Interval from 1 hour to 12 hours.
- D. Increase the Collection Interval from 1 minute to 15 minutes.
- E. Decrease the Collection Interval from 30 minutes to 5 minutes.

Answer: B, D

17. What determines the eligibility of a situation to a Navigator item?

- A. Situation type.
- B. Situation event state.
- C. Managed systems associated with the Navigator item.
- D. All situations are eligible for association with any Navigator item.

Answer: C

18. How does a sampled event get closed in IBM Tivoli Monitoring?

- A. A sampled event can be manually closed by a user.
- B. A sampled event is closed after 60 minutes by default.
- C. A sampled event is closed when the condition that raised it becomes true.
- D. A sampled event is closed when the condition that raised it is no longer true.

Answer: D

19. What is provided for a user to view agent specific IBM Tivoli Monitoring (ITM) data when Application Support is installed and configured on ITM components?

- A. Workspaces, Users, Events
- B. Workspaces, Situations, Queries
- C. Expert Advice, Charts, Templates
- D. Situations, Queries, Take Actions

Answer: B

20. Which two items are managed by right clicking an agent in a navigator tree? (Choose two.)

- A. Queries
- B. Policies
- C. Situations
- D. Attributes
- E. Attribute Groups

Answer: B, C
